Delaware Soybean Production Up from 2020

DOVER, DE – The U.S Department of Agriculture’s National Agricultural Statistics Service (NASS) August 1 forecast of soybean production for beans is forecast at 7.74 million bushels, up 7% from 2020. Based on conditions as of August 1, yields are expected to average 49 bushels per harvested acre, unchanged from 2020. Area harvested for beans is forecast at 158 thousand acres, up 7% from 2020.

Delaware corn production for grain is forecast at 27.2 million bushels, down 3% from 2020. Based on conditions as of August 1, yields are expected to average 160 bushels per harvested acre, unchanged from 2020. Area harvested for grain is forecast at 170 thousand acres, down 3% from 2020.

The forecasts in this report are based on conditions as of August 1. Any potential impacts from severe weather that occurred after August 1 will be reflected in future reports.
